(1) Assumes conversion of all of the holder's CODES at a conversion rate of 33.40 shares of CD common stock per \$1,000 principal amount at maturity of the CODES. This conversion rate is subject to adjustment, however, as described under "Description of the

CODES - Conversion Rights". As a result, the number of shares of CD common stock issuable upon conversion of the CODES may increase or decrease in the future. Does not include shares of CD common stock that may be issued by us upon purchase of CODES by us at the option of the holder.

- (2) Calculated based on Rule 13d-3(d)(i) of the Exchange Act, using 857,074,916 shares of CD common stock outstanding as of June 30, 2001. In calculating this amount for each holder, we treated as outstanding the number of shares of CD common stock issuable upon conversion of all of that holder's CODES, but we did not assume conversion of any other holder's CODES. Does not include shares of CD common stock that may be issued by us upon purchase of CODES by us at the option of the holder.

Investing in the CODES or shares of CD common stock involves risks that are described in the "Risk Factors" section beginning on page 5 of the prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus supplement is truthful or complete. Any representation to the contrary is a criminal offense.
