Presentation to Investors

August 2014

Forward-Looking Statements

Statements about future results made in this presentation constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements include projections.

These statements are based on current expectations and the current economic environment. Forward-looking statements and projections are inherently subject to significant economic, competitive and other uncertainties and contingencies, many of which are beyond the control of management. The Company cautions that these statements are not guarantees of future performance. Actual results may differ materially from those expressed or implied in the forward-looking statements.

Important assumptions and other important factors that could cause actual results to differ materially from those in the forward-looking statements and projections are specified in the Company's most recently filed Form 10-K, Form 10-Q and other SEC filings.

You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date stated, or if no date is stated, the date of our last earnings conference call.

This presentation includes certain non-GAAP financial measures as defined under SEC rules. Important information regarding such measures is contained within this presentation, including in the Glossary section.

Glossary

This presentation includes certain non-GAAP (generally accepted accounting principles) financial measures as defined under SEC rules. We have provided below reasons we present these non-GAAP financial measures, a description of what they represent and a reconciliation to the most comparable financial measure calculated and presented in accordance with GAAP. Because of the forward-looking nature of the Company's forecasted non-GAAP Adjusted EBITDA, free cash flow, pretax income and diluted earnings per share, excluding certain items, specific quantifications of the amounts that would be required to reconcile forecasted net income, net cash provided by operating activities, pretax income and diluted earnings per share are not available. The Company believes that there is a degree of volatility with respect to certain of the Company's GAAP measures which preclude the Company from providing accurate forecasted GAAP to non-GAAP reconciliations. Based on the above, the Company believes that providing estimates of the amounts that would be required to reconcile the range of the non-GAAP measures to forecasted GAAP measures would imply a degree of precision that would be confusing or misleading to investors for the reasons identified above.

Adjusted EBITDA

Adjusted EBITDA represents income (loss) before non-vehicle related depreciation and amortization, any impairment charge, transaction-related costs, non-vehicle related interest and income taxes. Adjusted EBITDA excluding certain items represents Adjusted EBITDA excluding restructuring-related expenses, costs related to early extinguishment of debt and other certain items as such items are not representative of the results of operations of our business. We believe that Adjusted EBITDA and Adjusted EBITDA excluding certain items are useful as supplemental measures in evaluating the aggregate performance of our operating businesses. Adjusted EBITDA is the measure that is used by our management, including our chief operating decision maker, to perform such evaluation. It is also a component of our financial covenant calculations under our credit facilities, subject to certain adjustments. Adjusted EBITDA should not be considered in isolation or as a substitute for net income (loss) or other income statement data prepared in accordance with GAAP and our presentation of Adjusted EBITDA may not be comparable to similarly-titled measures used by other companies. We believe that the measures referred to above are useful as supplemental measures in evaluating the aggregate performance of the Company.

Free Cash Flow

Represents Net Cash Provided by Operating Activities adjusted to reflect the cash inflows and outflows relating to capital expenditures and GPS navigational units, the investing and financing activities of our vehicle programs, asset sales, if any, and to exclude debt extinguishment costs and transaction-related costs. We believe that Free Cash Flow is useful to management and investors in measuring the cash generated that is available to be used to repurchase stock, repay debt obligations, pay dividends and invest in future growth through new business development activities or acquisitions. Free Cash Flow should not be construed as a substitute in measuring operating results or liquidity, and our presentation of Free Cash Flow may not be comparable to similarly-titled measures used by other companies.

Reconciliation of Free Cash Flow to net cash provided by operating activities:

	Year Ended December 31, 2013
Free Cash Flow	\$ 460
